

A scenic photograph of a sunset over a body of water. The sun is a bright yellow-orange orb on the horizon, with its light reflecting on the water. The sky is a mix of blue, orange, and yellow, with wispy clouds. In the foreground, the dark silhouettes of trees and a shoreline are visible against the bright sky.

Community Level Watershed Management Planning

What is a Soil and Water
Conservation District?

County

Cities

What is the difference of
Community Needs?

PEOPLE

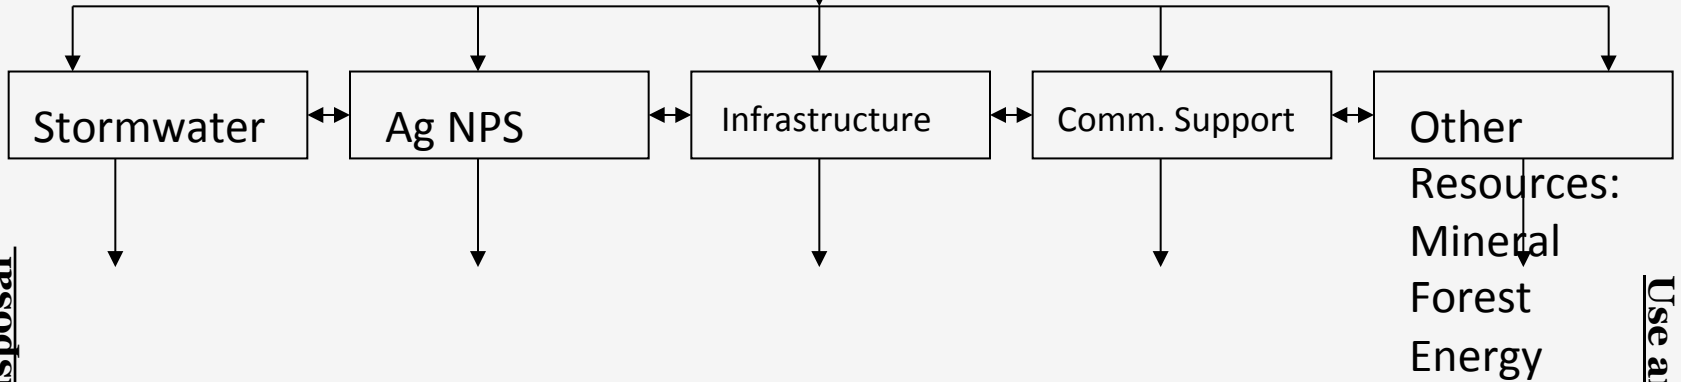

Villages

Towns

1. Understanding a complete municipal watershed system will help to plan for community, future and natural resources.

So what?

Municipality

Use and Disposal

Use and Disposal

Community Involvement and Understanding

Utilize Your Resources

Who Are they?

2. Utilize already existing
resources and partners.

But Why?

3. Why is it important to develop a watershed plan and how does all the community benefit?

- Long Term support for the 5 categories
- Community interrelations
 - Local pride, support, responsibilities = neighborhood ownership over all generations
- Economic development / Local workforce growth/sustainability and Natural Resource Protections

Actual Impacts?

- Town of Macedon: William Hammond – “By planning for the agricultural components it has a long term impact on all of the land owners, even down to the individual homeowner.”
- Retired Planning Department Director: Sharon Lilla – “Green infrastructure planning offers opportunities for future maintenance understanding that is sustainable for our local communities in a bigger picture perspective.”
